About Me

A professional technology consultant with 8 years of hands-on experience in delivering customer-facing digital and AI projects end-to-end, from discovery and solution design, to build, test, and deployment. Possess domain knowledge across industries, including Financial Services, Hospitality, Property Management, and Retails. Adept at AI delivery – most recent project designed and evaluated an LLM-powered search product for a major insurer, including prompt design and a evaluation pipeline for a regulated market.

Work Experience

Aug 2025 – Present

Technology Consulting Manager

Deloitte

Delivering AI and data engagements for financial services and retail clients from end-to-end, drove requirement workshops, solution delivery, testing and deployment across multi-market programmes.

► AI Search Product (Google Vertex AI) – Major Insurer (Fortune 500)

Solution & Delivery Lead

- Delivered an LLM-powered search across 3 markets, owning solution design, evaluation and launch readiness end-to-end
- Built a Python evaluation pipeline scoring model output for groundedness via Vertex AI's Gen AI Evaluation Service, replacing manual spot checking with streamlined quality check
- Designed the guardrail architecture, including system preamble, pre-query classifier and programmatic output filter to contain hallucination and unwanted responses for the heavily regulated market
- Engineered and iterated system prompts to constrain output to Traditional Chinese and to client tone-of-voice requirements
- Advised on compliance and regulatory requirements and handling (Insurance Authority GL8)
- Drove the search UX with client, including prompt suggestions, placeholder guidance and a guided questionnaire using progressive disclosure

► Internal AI Knowledge Search with Custom RAG – Major Insurer (Fortune 500)

Project Manager

- Drove delivery from requirement gathering, build, test, and deployment for the company's internal AI knowledge system, which handles 30,000+ documents and serves 100+ users across 10+ BUs
- Aligned and set expectation with BU on AI behaviour, guardrails, and regulatory requirements via stakeholder workshops
- Trained and guided business users through AI evaluation which is new to most of the business users, and align a shared standard for what constitutes an acceptable answer
- Perform root cause analysis across retrieval and generation failures to identify issues in source content / prompt / chunking

► Enterprise Analytics Platform – Pan-Asian Retail Group (Fortune 500)

Project Manager / Data Delivery

- Delivered common data model with 27 Tableau reports across 5+ BU
- Drove and managed requirement workshops to align data behaviour with business units, and align technical constraints
- Led overall testing and independently traced data lineage through gold-layer BigQuery tables to root cause failing logic

Sep 2019 – Aug 2025

Technology Consulting Associate Manager

Accenture Company Limited

Led digital, and AI/ML projects for Fortune 500 companies across financial services, hospitality, technology, and manufacturing industries. Received excellent feedback from clients, was awarded 5 high-performance bonuses in 6 years

- ▶ **Product Recommendation Engine** – Major Insurer (Fortune 500)
Project Manager
 - Adopted Machine Learning to recommend product for customers in various demographic, which drove conversion by 5%+
 - Drove end-to-end delivery from ideation to launch with cross-functional team of 10+ members across UX/UI, BA, Development and testing teams
 - Managed and delivered gap analysis, requirement workshops, user stories, test cases, etc.
 - Co-ordinated director-level stakeholders from 5+ departments including external vendors across different regions
- ▶ **Data-Driven Personalization** – Leading Hospitality Group (Fortune 500)
Data Team Lead
 - Drove marketing clickthrough up 20%+ and conversion up 10%+ by applying data insight and personalization to live campaigns
 - Managed client and external vendors across APAC and the US on contract negotiation, resourcing and delivery
- ▶ **Product Customer Strategy Planning** – Leading Global Bank (Fortune 500)
Product Manager
 - Advised on overall product strategy in offer, marketing, and positioning across customer touchpoints, which drove 10%+ revenues
 - Defined the own channel experience across call center, Banking App, eDM / SMS to ensure meaningful customer engagement

Jun 2018 – Aug 2019

Assistant Project Manager

NOVA Group / Introv Limited

- Delivered 20+ end-to-end digital projects across retail, hospitality, financial services and property, from pre-sales pitch through implementation, testing and production support
- Implemented an accounting and inventory platform for an audio-visual engineering firm, saving two headcount worth ~USD \$100K per year; separately became sole SME for a new inventory product deployed to a 20+ outlet Michelin-awarded restaurant group

Education

Aug 2014 – Jul 2018

Bachelor of Business Administration (Hons) - Accountancy

City University of Hong Kong – coursework in Computer Science, Business Analytics, Digital Media
